INDIVIDUAL AND FAMILY PORTRAITS

Individual and family portraits sessions are $295. Unlike some studios, we don't limit the number of people who can participate. Sessions typically last an hour or two and take place at a location of your choice in the Snohomish County area. All of the final images are carefully and creatively hand processed before they are released. Approximately one week after the session, your images are made available to you for viewing in a private online proofing gallery.

All of our clients receive (8) 4x6 prints, (8) 5x7 prints, (3) 8x10 prints and (2) 11x14 sized prints. We also provide you with a disc containing email friendly images taken from the session so that you can send your favorite photographs to friends and family or upload them to your Facebook page. Additional prints and a disc of the high resolution images can be purchased separately.

UNCOMPROMISING IMAGE QUALITY

We take great care to make sure your family portraits look nothing short of amazing. Although we capture everything in vibrant color, we love processing duplicate versions of our favorite shots. This may include black and white, cyanotype, duotone, sepia and more! We can even give some of your images an analog, cinematic treatment reminiscent of old Hollywood movies. The best part is that you don't have to give up the vibrant, color versions if you want to try something different. When we are finished, you will have over 200 images to choose from.
